***Acknowledgement***

Receipt is acknowledged of the Amendment filed January 30, 2004.

***Reasons for Allowance***

Claims 33-38, 40, 48-58, 60, and 61 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Law et al., taken alone or in combination of other references, does not teach or fairly suggest a method or a programmable logic integrated circuit comprising, among other things, a first tristate driver that is dynamically tristated using a third logic element (claim 33), a dedicated tristate device having an input coupled to the first programmable interconnect bus (claim 48), an interconnect line coupled to the second output and the fourth output, wherein the interconnect line is not coupled to the second input and the fourth output by a programmable connection, and the second logic element dynamically tristates and dynamically enables the first tristate driver (claim 52), a third tristate driver having an input coupled to the first interconnect bus and an output coupled to the second interconnect bus; third and fourth logic elements having inputs coupled to the second interconnect bus, wherein the first tristate driver, the second tristate driver, and the third tristate driver are dynamically tristated and enabled (claim 56), and a tristate driver coupled between a first logic element that is configurable to implement combinatorial functions and a first interconnect line, a tristate switch coupled between a second logic element that is configurable to implement combinatorial functions and a second interconnect line, wherein a control input of the tristate switch is coupled to the output enable generation circuit (claim 58), as set forth in the claims.

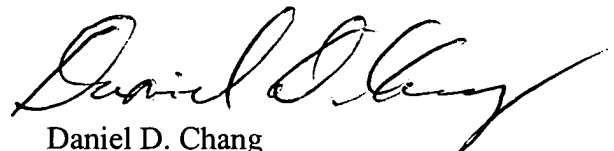

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
